# Making The Switch To Paper Tape

We are excited to share that, in our ongoing effort to improve the sustainability of our packing and delivery processes, we have replaced plastic tape with water-activated paper tape.

The Benefits of this change include:

- Tape is cut to length, reducing waste
- Enhanced security due to its durable design
- Improved efficiency, as less tape is required on each delivery
- Easier recycling, as all materials can go through one waste stream, including the shredded cardboard packaging protection used

We are enthusiastic about embracing this eco-friendly initiative and will continue to seek ways to enhance our practices for more sustainable and effective operations in line with our Building Better Strategy.

## Volunteering At The Inclusive Farm

Last month, Equans invited Andrew from our sales team, to spend a day helping out at the inclusive farm.

The farm provides an opportunity for students to learn practical skills and train them for a career in agriculture.

Andrew had a fantastic time working with all the animals and learning more about the brilliant work founders Mike and Ness are doing.

Well done Andrew for getting involved and thank you to the teams at Equans and Inclusive Farm for coming to us with this brilliant opportunity.

## Welcome To The Team Richard, Netta & Ruan

We would like to wish a warm welcome to our three newest team members: Richard, Netta and Ruan.

- Richard joins us, in our new Head Of Operations position. This is a big role to fill, but we believe that with his years of experience, Richard is the right man for the job.
- Netta and Ruan have joined our expanding sales team as strategic relationship managers. During the onboarding phase, their main focus has been building relationships with our customers and seamlessly integrating with the team.
