About Diverse PPE

Why Is It So Important?

Having PPE that fits for all workers in the built environment is crucial from a health and safety standpoint. It goes beyond just size; it involves ensuring proper fit, form, and function for individuals performing various roles. Simply sizing down doesn't often provide a suitable solution. Incorrectly sized PPE can lead to risks such as snagging, entrapment, restricted movement, discomfort, and reduced visibility. To address these issues, it is essential for employers to prioritize well fitting PPE to safeguard the health and safety of all workers equally.

Equality, diversity, and inclusion are crucial elements in fostering a positive and thriving work environment within the construction industry. Embracing these principles not only ensures fairness and equal opportunities for all individuals but also promotes innovation and success within the sector.

Historically, finding inclusive PPE has been a challenge, posing safety risks to large groups of construction workers. OnSite Support are pleased to be working with and our trusted suppliers, to offer a full range of inclusive PPE.

"Safe and comfortable PPE is a basic requirement for construction workers, but many individuals on site are still being asked to wear ill-fitting and uncomfortable PPE. We also see the need for good communication on what is available as this is something the industry is trying to improve on. We are glad to see that our clients are taking the requirement for inclusive PPE seriously and we look forward to continuing the work we are doing together to support a more diverse workforce"

- Warren Lynes, Managing Director

One key issue is the lack of gender-specific PPE, which not only affects women's safety but also their work efficiency and overall well-being. Fortunately, in the last five years, manufacturers such as LEO, Regatta, V12, Bolle, Traffi, Pulsar and Rockfall have made strides in developing a broader range of gender-specific PPE to promote diversity and inclusion within the industry.

Factors such as gender, race and physical attributes can cause individuals to require PPE in larger or smaller sizes. By offering a range of sizes, construction companies can promote inclusivity and ensure that all workers, regardless of their size or stature, have access to the necessary protective gear.

There are various other considerations we have taken into account when thinking about promoting equality, diversity and inclusion with wates. One of which is including prescription safety glasses in our PPE offering to allow those with visual impairments to carry out their duties without putting their eyes at risk. We are also able to supply our clients with maternity garments created for a growing bump, to allow pregnant women to continue working on site.

In conclusion, prioritising equality, diversity, and inclusion in the construction industry is not only ethically important but also essential for creating a safe and thriving work environment. With a focus on offering inclusive PPE, companies like OnSite Support working with our clients and partners are making significant strides towards ensuring the safety and well-being of all construction workers.

We are continuously working with our manufacturing partners to find the best solutions for our clients. Please contact us for more options and alternatives.

The following contents are a selection of our most popular diverse solutions, that people may struggle to find elsewhere to satisfy their diverse needs. Please contact us if you struggle to provide appropriate solutions for your diverse workforce population.

- Non-slip nose bridge and Bi-material temples for more comfort
- UVA and UVB Protection - Smoke Only

Code	Description
SP2RP1	Clear
SP2RP2	Smoke
SP2RP3	Twilight
SP2RP4	CSP

Inclusive Size Range

Safety glasses generally come in one size fits all. However, with so many different face shapes, it can be difficult to find a perfect pair. If the safety eyewear does not fit your face correctly leaving larger gaps between your face and the glasses, it may allow debris to enter the eye area, which can lead to an eye injury. Bollé specifically developed for smaller and narrower faces.

Bollé RUSH+ Small Safety Glasses Eco Pack

- Specially designed for narrow faces
- Wrapped in silk paper – no plastic packaging
- Panoramic field of vision
- Non-slip nose bridge and Bi-material, ultra-flexible temples
- UVA and UVB Protection - Smoke Only
- Pack of 20

Factors such as hair type, head shape and religious headwear could make finding hearing protection difficult. There are plenty of non-headband options out there that provide high levels of protection in loud environments. Did you know that some manufacturers like 3M even offer 'hearing fit' testing for their products.

Code	Size
V1215.01	3-13

Female feet tend to have a narrower heel, shorter toe length, higher arch, and smaller overall size. These anatomical differences mean that simply scaling down men's work boots is not a fitting solution. Therefore, selecting a boot designed on a women's safety boot last, helps to provide higher levels of comfort and most importantly - safety. Adult feet can vary in shape size and shape which is why we offer some female ranges starting at adult size 1 and male ranges up to size 22.

V12 Women's LYNX Boot
